Iowa Liquor Sales: Cursory EDA and Summary

The Iowa Liquor Sales Data set contains 12M transactional records for all liquor store sales between 2012 - Oct 2017 for the State of Iowa. Numerous data types are included in this data set including categorical, geo-spatial and sales/transactional data.

For this cursory analysis, a basic EDA summary is presented, outlining top performing regions and entities across different categories (vendors, items, stores, etc.).

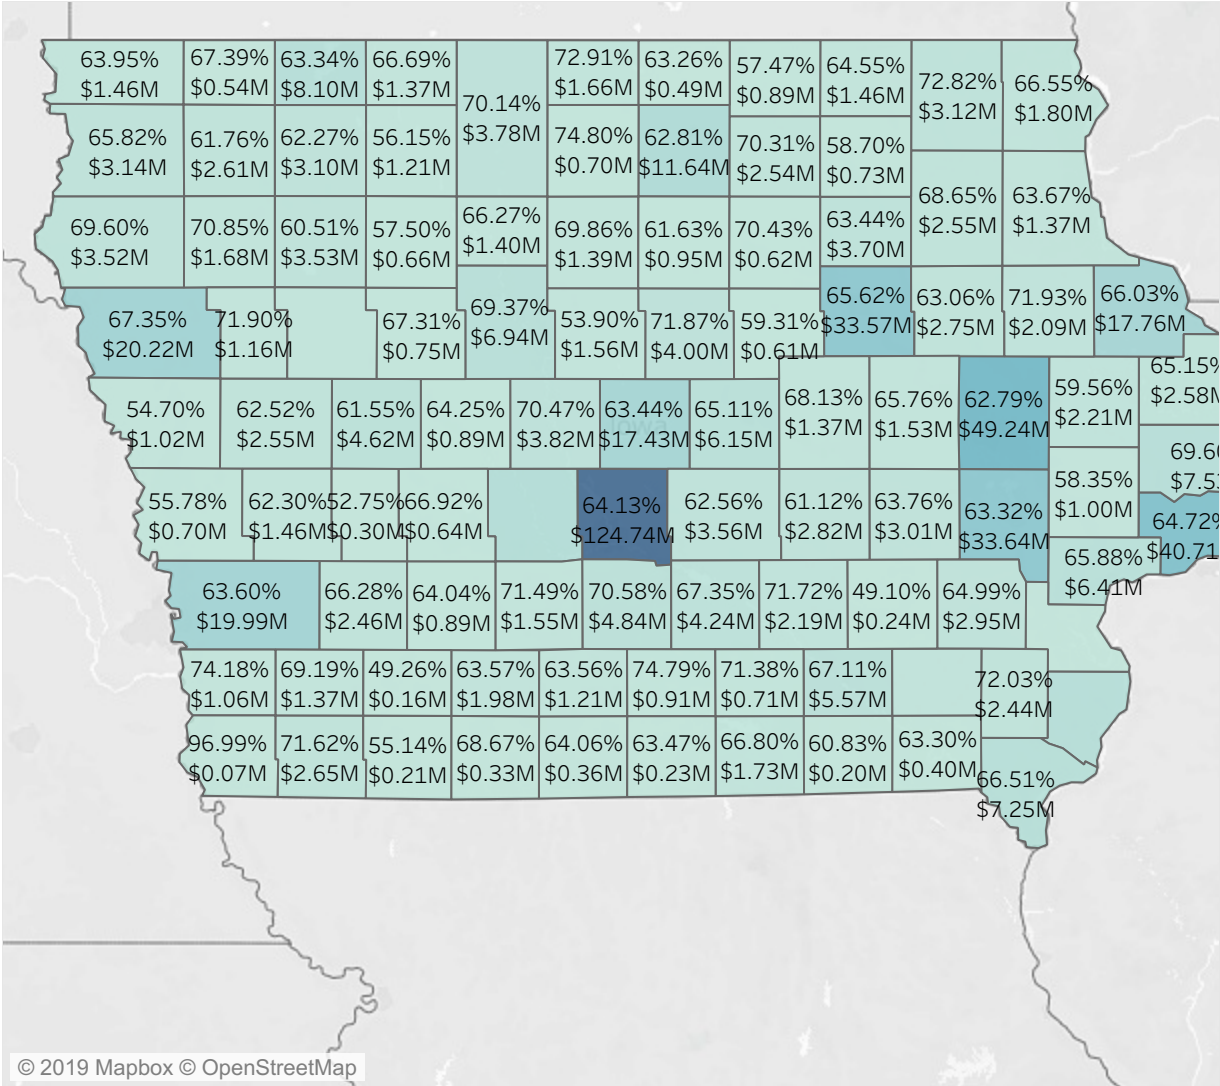

Note: All visualizations have Tooltip hover enabled.
